

UJWAL YADAV

COMPUTER SCIENCE GRADUATE & FULL-STACK DEVELOPER

+977 9811777551 • callmeuzwal@gmail.com • github.com/ujwal4262 • Rupani-01, Saptari, Nepal

PROFESSIONAL SUMMARY

Computer Science & Engineering graduate passionate about building modern web and mobile applications with clean architecture, intuitive user interfaces, scalable backend systems, and solid computer networking principles. Proficient in React.js, Node.js, Express.js, Python Flask, Computer Networks, Cisco Packet Tracer, MongoDB, MySQL, and Figma UI/UX design.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2022 – 2026

KIIT University • Bhubaneswar, Odisha, India

Relevant Coursework: Computer Networks & Protocols, Data Structures & Algorithms, DBMS, Cybersecurity Fundamentals, Software Engineering, Web Development.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), Python, Kotlin, HTML5, CSS3

Frontend Development: React.js, React Native, Tailwind CSS, Figma UI/UX Prototyping

Backend & Databases: Node.js, Express.js, REST APIs, JWT, Bcrypt, MongoDB, MySQL, Firebase, SQLite

Networking & Security: Computer Networks, Cisco Packet Tracer, TCP/IP, Router/Switch Config, IP Subnetting

Tools & Concepts: Git, GitHub, VS Code, Android Studio, Data Structures & Algorithms, OOP, Agile

FEATURED PROJECTS

Budget Tracking Application • [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#)

Full-Stack / ML

- Built a full-stack personal finance web application featuring secure JWT user authentication and expense categorization.
- Designed interactive data visualization charts for monthly spending trends and automated budget threshold warnings.

Clothes Shopping Application • [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#)

Full-Stack / ML

- Developed a modern apparel e-commerce web platform with real-time product category filtering and dynamic search.
- Implemented persistent cart management and smooth checkout workflows optimized for mobile and desktop screens.

AI Career & Mental Health Assistant • [React.js](#), [Node.js](#), [Express.js](#), [Python Flask](#), [ML](#)

Full-Stack / ML

- Architected a multi-service platform connecting a React client, Express API gateway, and Python Flask ML microservice.
- Integrated natural language processing models to deliver personalized career roadmaps and student support guidance.

Heart Disease Prediction System • [Python](#), [Scikit-learn](#), [Pandas](#), [NumPy](#), [Flask](#)

Full-Stack / ML

- Trained and evaluated machine learning classification models (Random Forest) on clinical patient diagnostic datasets.
- Deployed a lightweight Flask web API endpoint for fast real-time cardiovascular disease risk assessments.

Figma UI/UX & Product Design System • [Figma](#), [UI/UX Design](#), [Component Libraries](#)

Full-Stack / ML

- Created a comprehensive Figma design system featuring atomic UI components, responsive auto-layouts, and design tokens.
- Mapped user interaction flows and clickable prototypes to streamline client-side developer handoff.

CERTIFICATIONS

Introduction to Cybersecurity – Cisco Networking Academy (2025)

- Training covering network defense fundamentals, risk management, data privacy, and threat analysis.

Cisco Packet Tracer / Networking Basics – Cisco Networking Academy (2025)

- Hands-on certification in network simulation, router/switch configuration, IP subnetting, and protocol troubleshooting.
